INSTRUCTIONS ?

A few notes from The Hitman.

Well, first off I would like to say a few things about the wares that I released in the last 2 days. First off, when I put out The Case Disk #1 for 221B Baker St, I was under the influence that the ware was two sides, when actually it is only one. So, ignore the DDD file that says S1, there is only one side. Also, I released a ware called "Award Maker+" yesterday also. It is 4 sides, and is really good, but the problem is that you need docs. I am in the process of getting the docs for it along with the docs to this Baseball game as well. By the way, this Baseball game is entitled "Pure Stat Baseball" by Sub-logic, but odn't let the name fool you, it is a fantastic-looking baseball game. But, remember to get all 3 sides, you will need them. And now for the real reason I'm typing these notes

Ok, I'm back. One thing I don't like lately is all the rags being put on the new formed group "Dark Logic". First off, I think it is childish to rag on anybody. I hate the idea of rag pages, etc. But, I don't think it is fair for a new group to get ragged on when they are trying to compete in the world of piracy. I don't know all the group members, however I do know 3 of them, and 2 of them I consider good friends. These people are Back Bay Hacker and The Martyr. Both of these guys are very cool people. They will do anything for anybody. Mike has sent me numerous 2GS wares, and I have traded with Keith a few times as well. They are both caring people, and I don't think they deserve the shit they are getting from anybody! The other guy I know in Dark Logic is Brian Fist. I'm sure most of you know who he is, as he has been becoming fairly well-known lately. I don't know him all that well but, there's more!

I do know that he hasn't been getting such a good reputation lately. I also feel that some of it is his fault, but you have to remember he is new to pirating, and he has made ALOT of mistakes, and I know he has alot of enemies, but let's just give the guy a break. I'm not saying that he is the coolest or anything, but he isn't that bad of a guy, and he is fairly talented If you ask me, this guy, if he has the chance can really put his talents to use in the pirate world. But, what I'm trying to say is even if you don't like Brian Fist, it isn't a good reason to rag on the entire group. The Back Bay Hacker is the leader of the group, and he knows what he's doing, so let's give him a chance to get the group organized, and don't past judgement until Dark Logic gets a fair trial.
